

ClinEpiDB

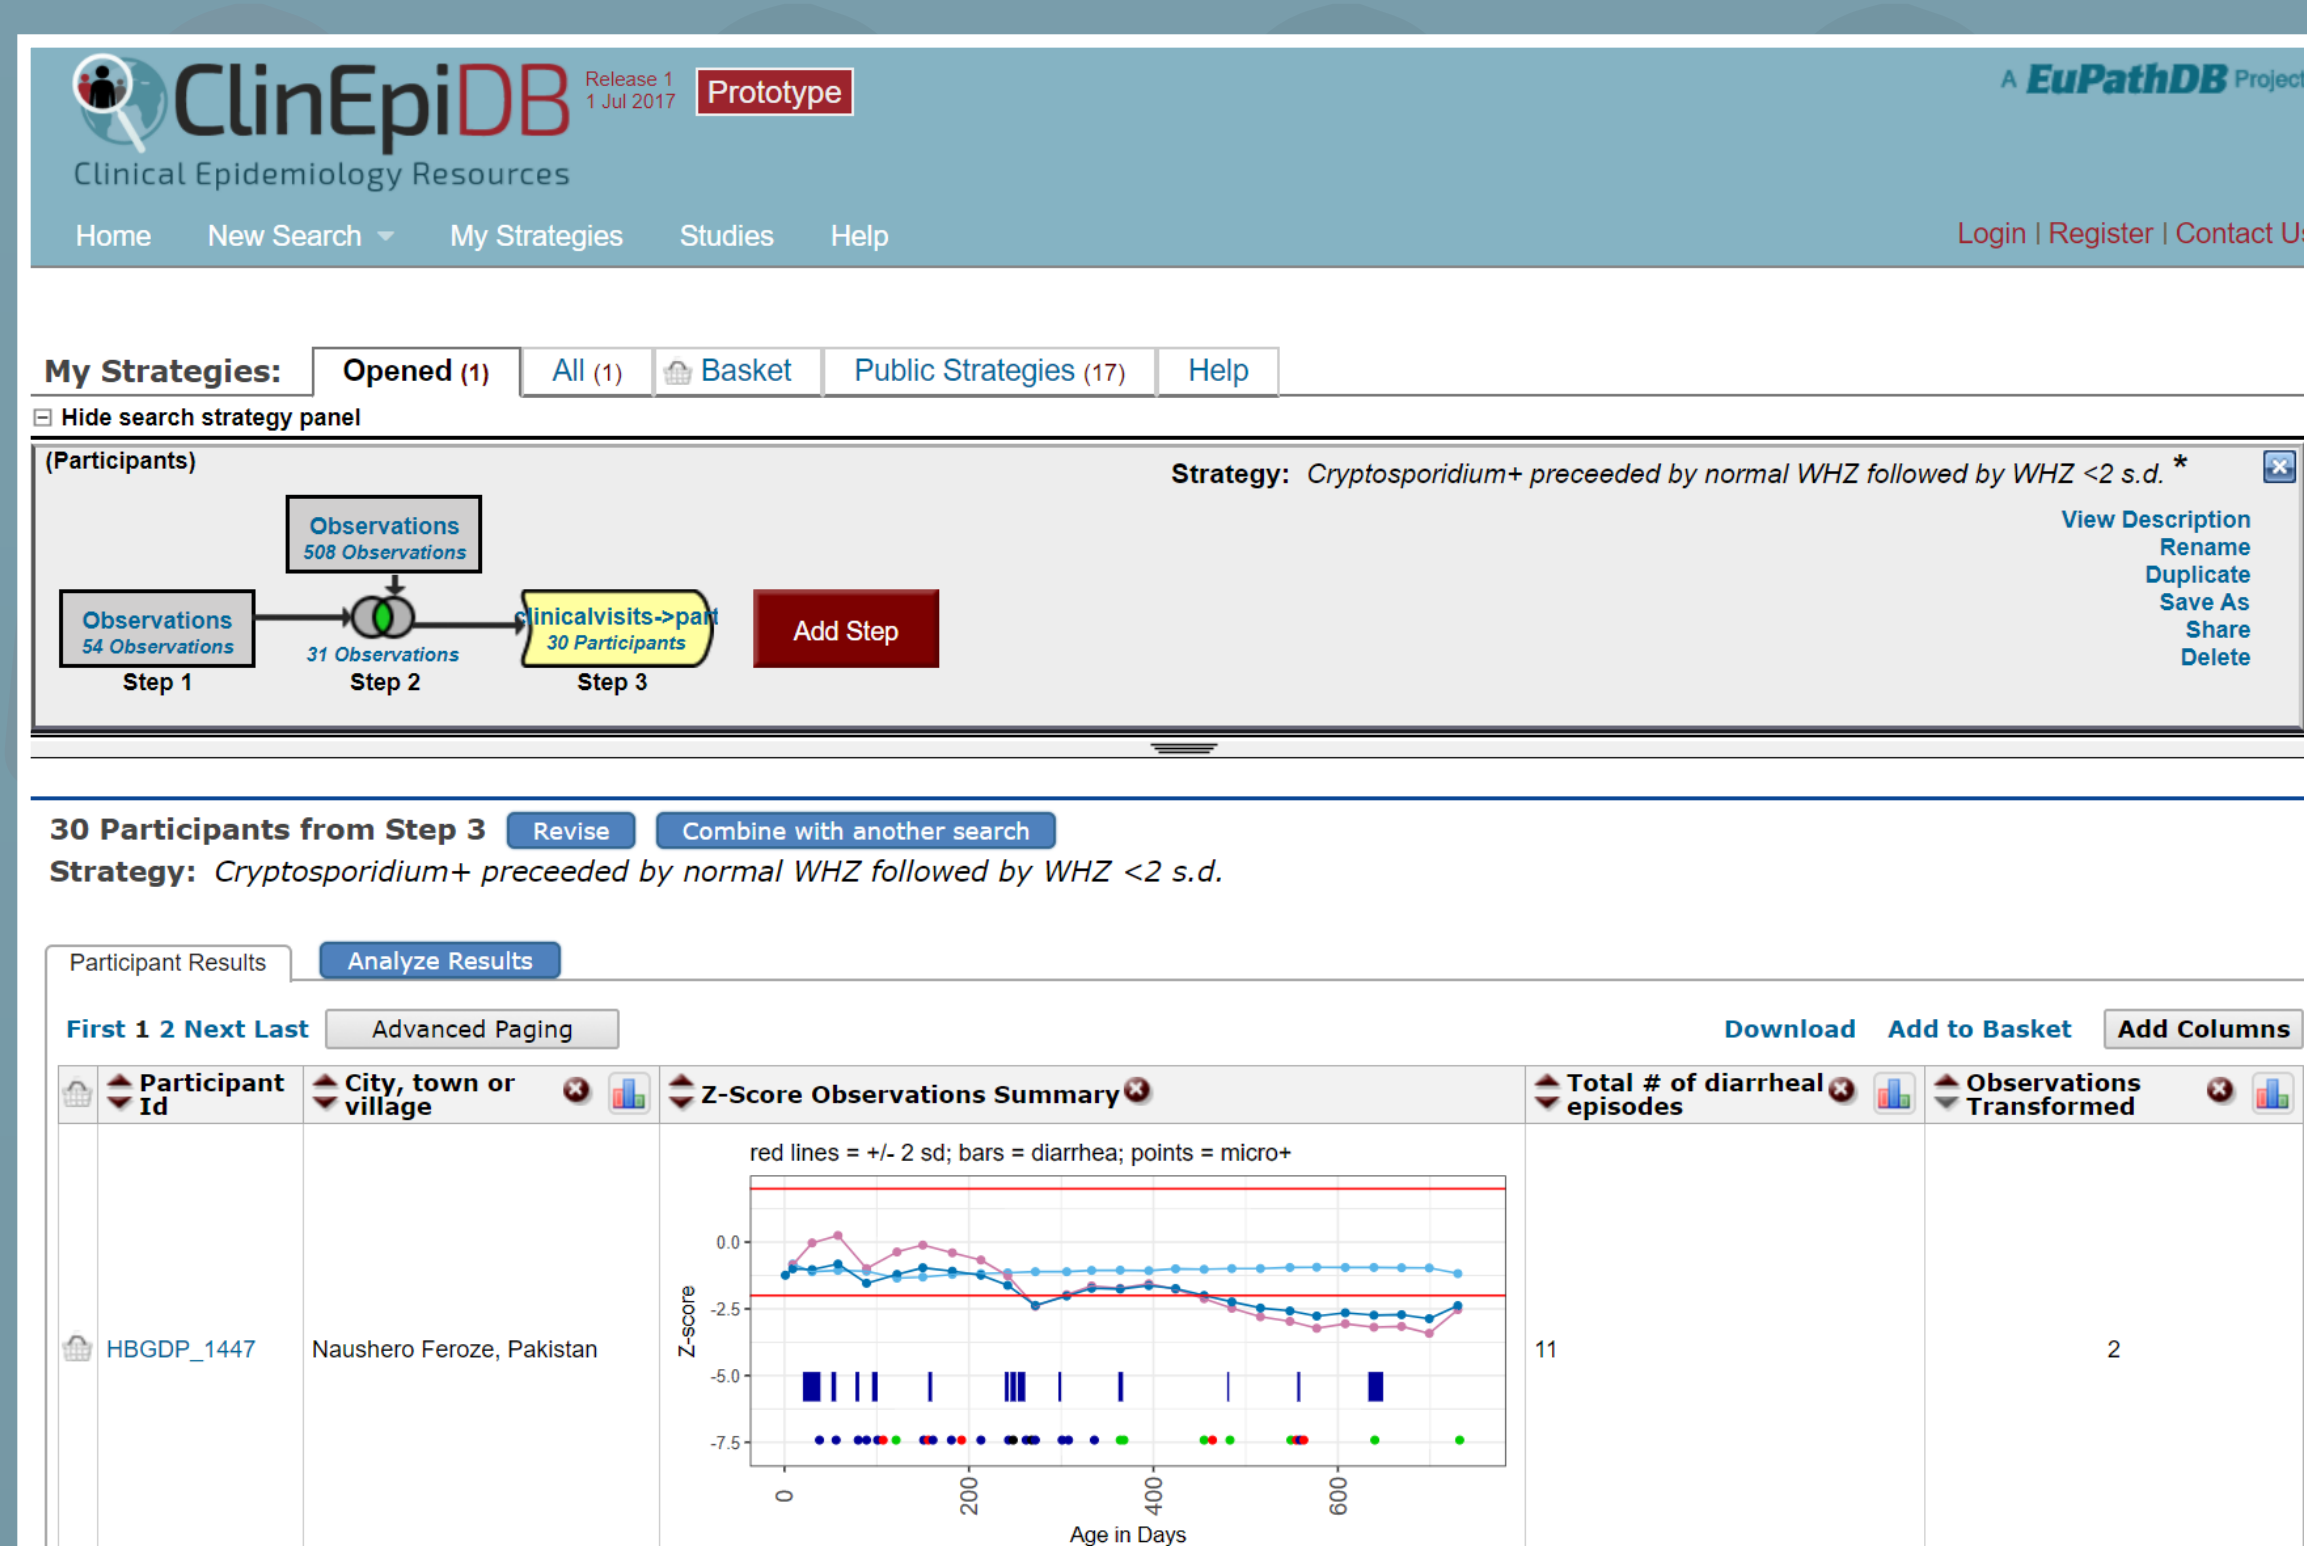

A data resource designed to facilitate the exploration and mining of epidemiological study datasets.

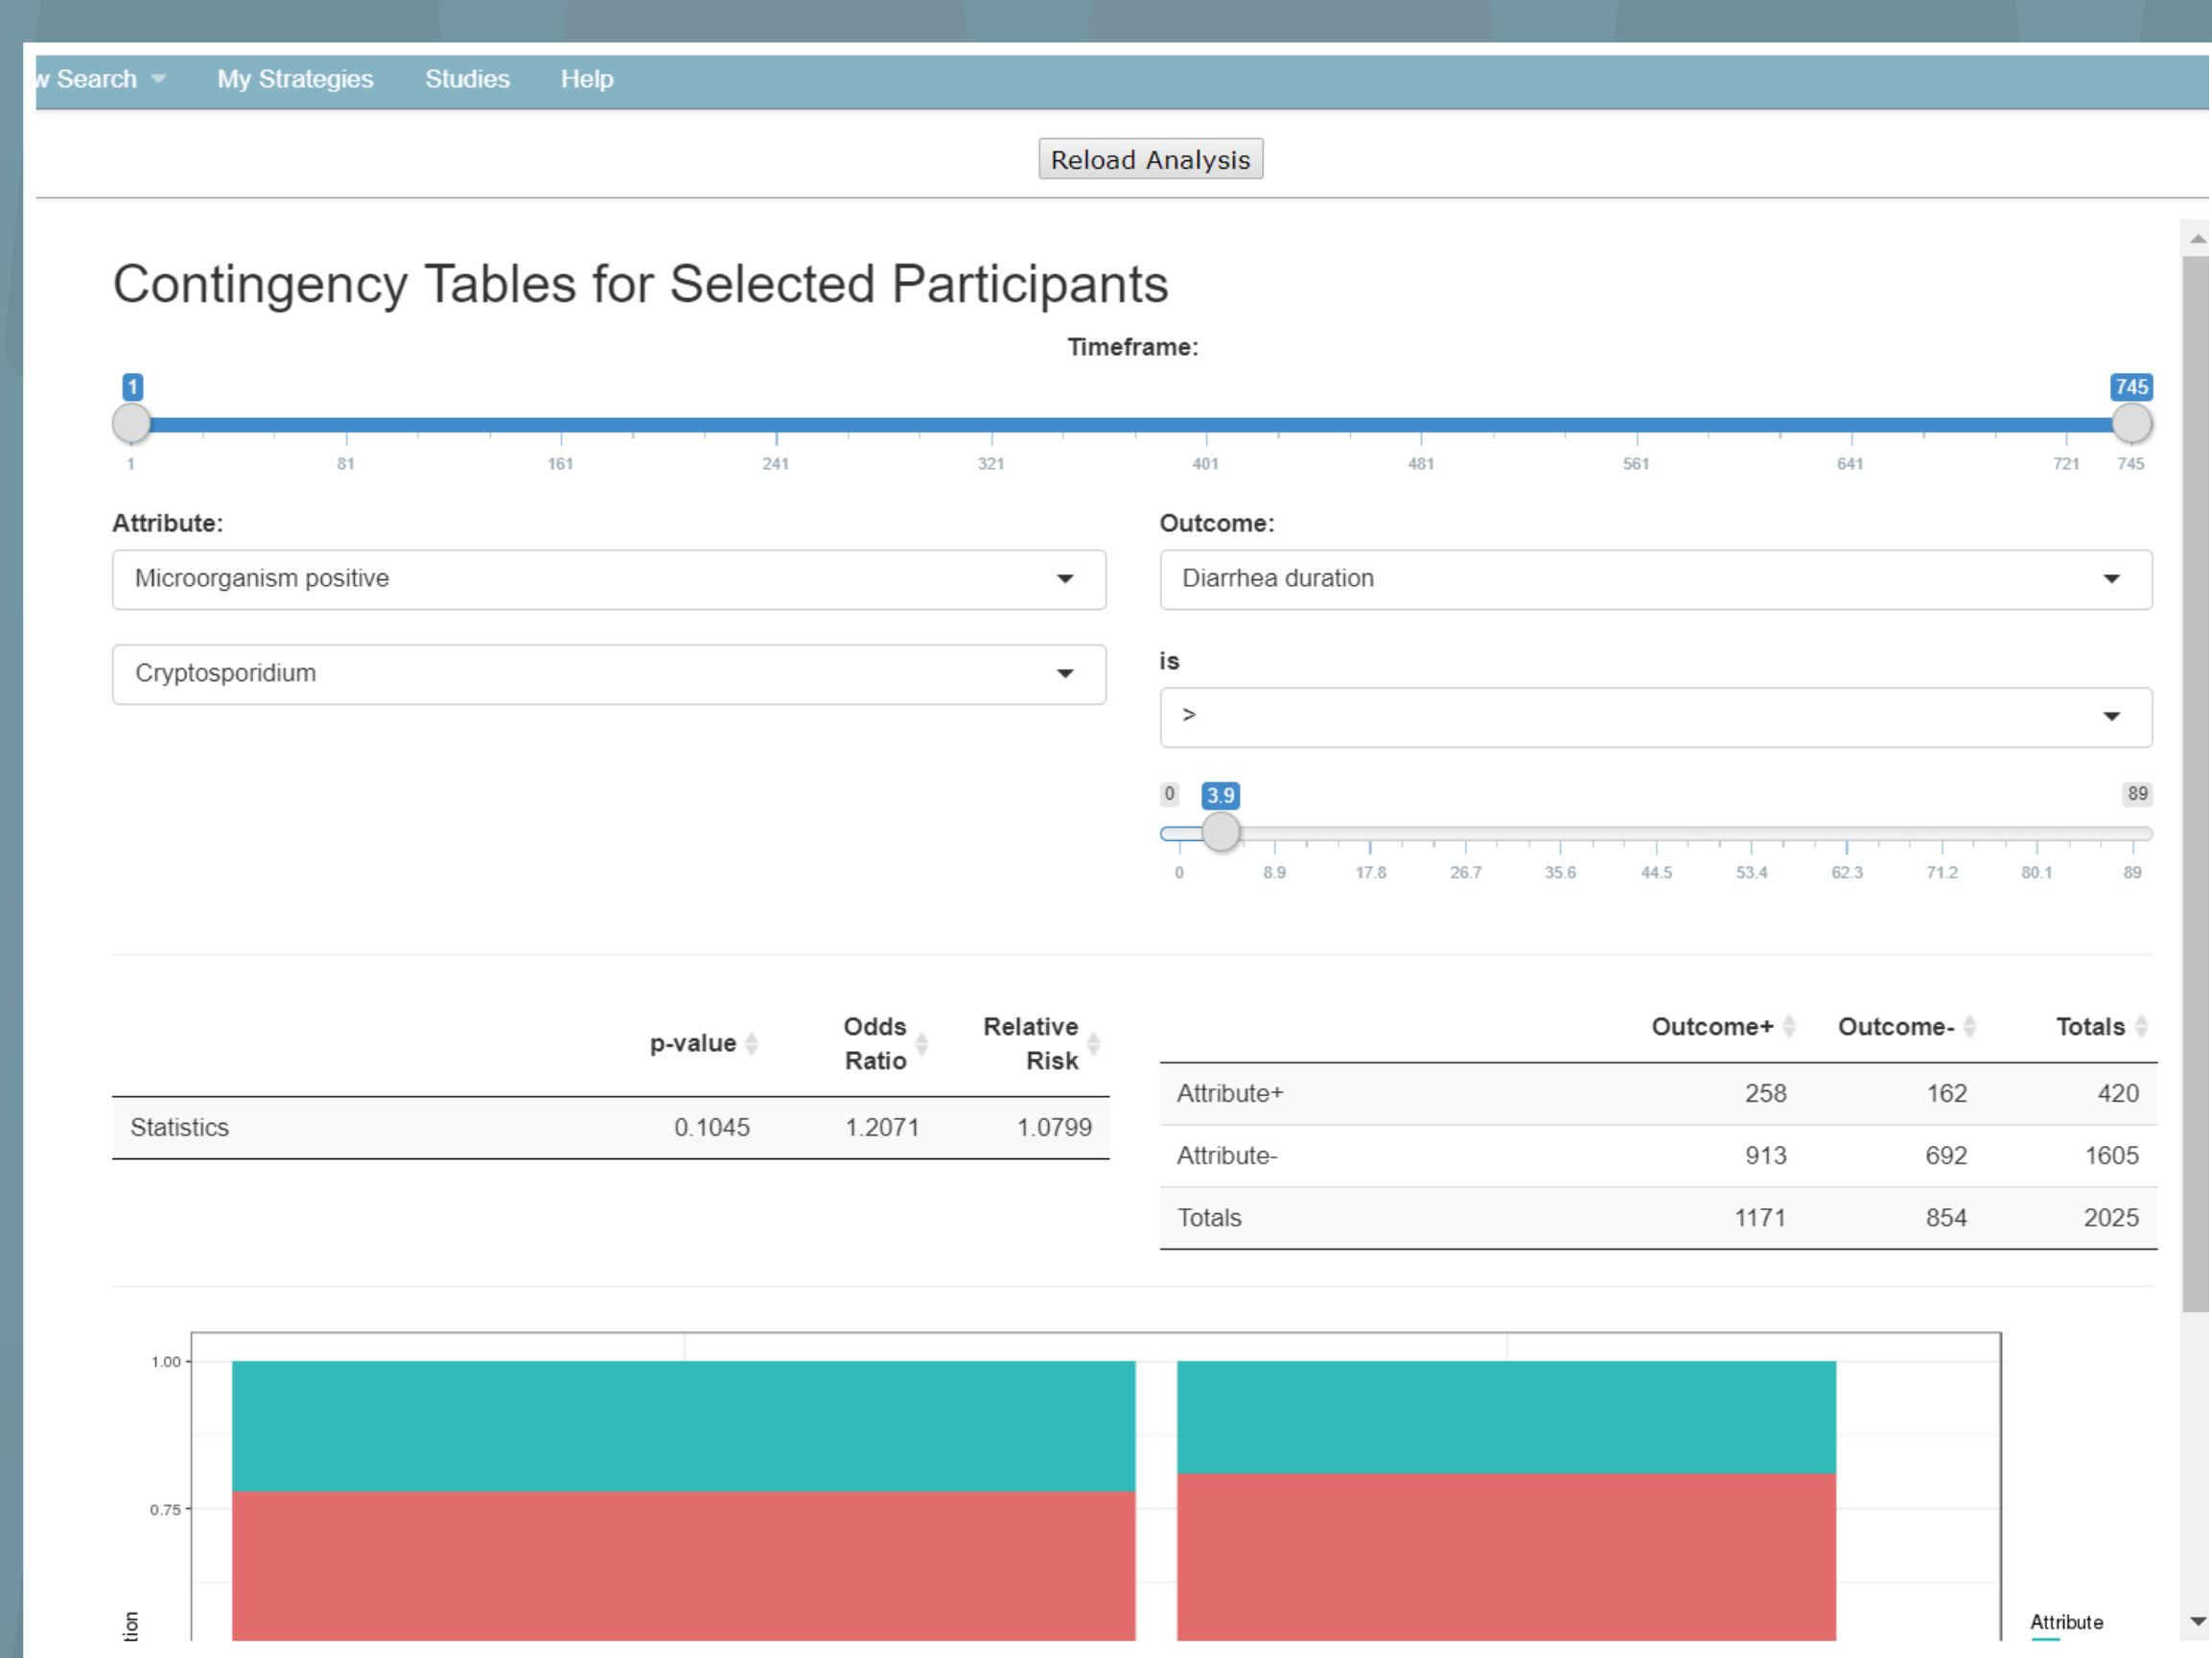

Integrate, explore & examine data sets collected by infectious disease researchers around the world.

Develop familiarity with study variables through easy-to-use filtering and query mechanisms.

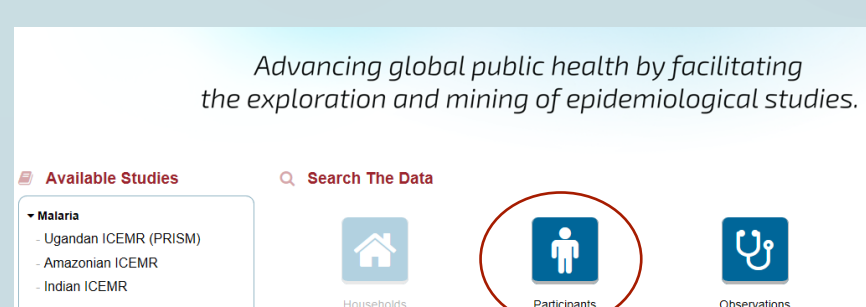

Build complex strategies, view results in tables with summary figures or download the dataset for analysis using your own statistical analysis software.

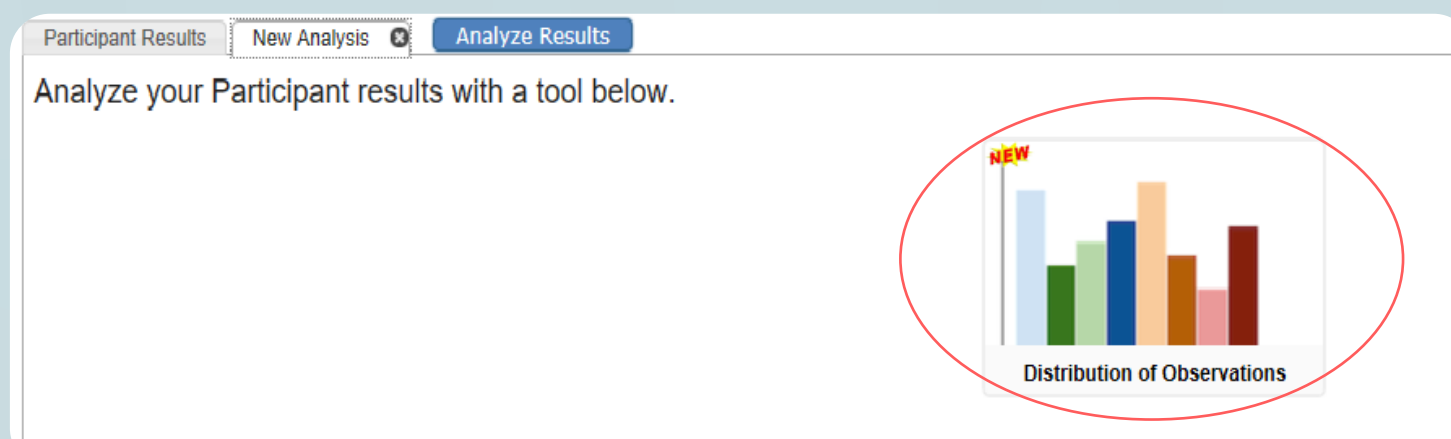

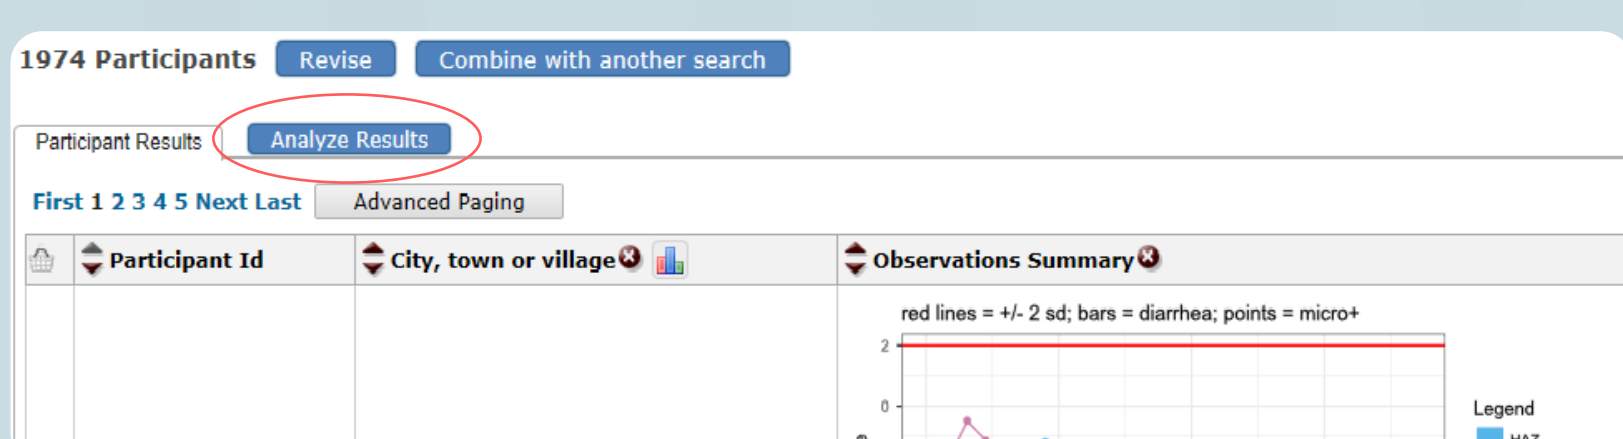

Use tables, interactive visualizations and exploratory analysis tools to develop hypotheses.

Get A Distribution Graph in a Few Easy Steps

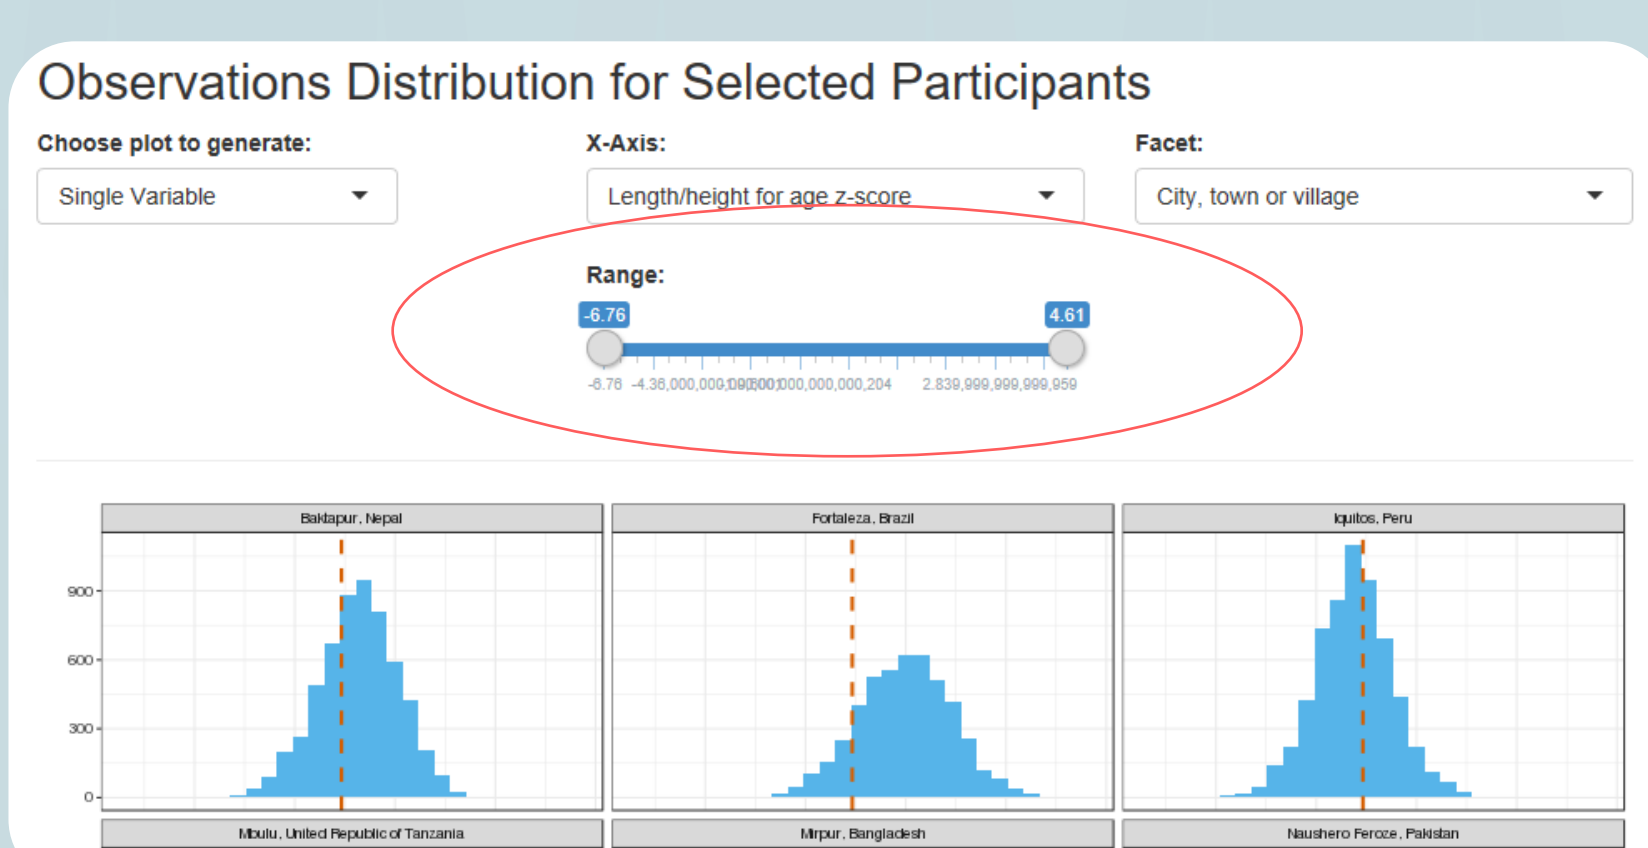

1 From the ClinEpiDB home page, run a **Participants Search**. View your results.

2 From your results page, **Analyze Results**

3 Configure your distribution graph
